

The 2008 canoe journey

CANOE COUNTRY / LAKE DEPTHS, FISHERIES EVIDENCE & EXPERIMENTAL PORTAGE VIEWS

FOLLOW THE FIVE SOURCE SEGMENTS

Day 1 Day 2 Day 3 Fourth Day Last Day

C1-C5: historical camps • F1/F2: personal bass observations
P01-P12: candidate landings; crosses mark canoe viewpoints.

READ BEFORE USING

Sheets 02-05 pair route maps with separate historic depth scans.
Page 06 separates surveyed fish, stocking and observations.
Route lines are historical sketches; they sometimes cross land.
Gray land has no lidar in this crop. Terrain views omit trees.

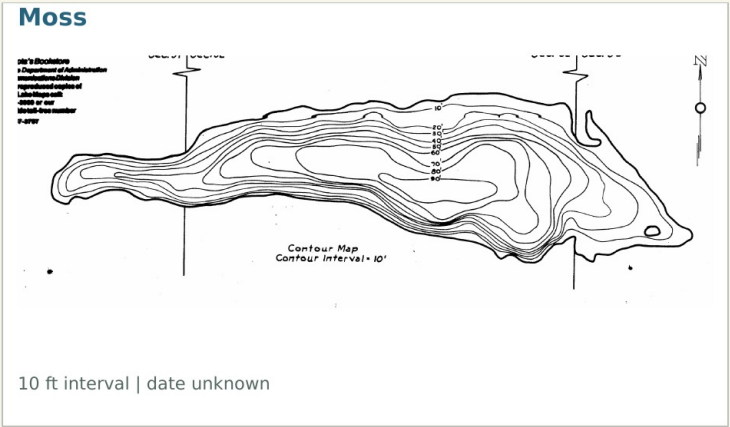

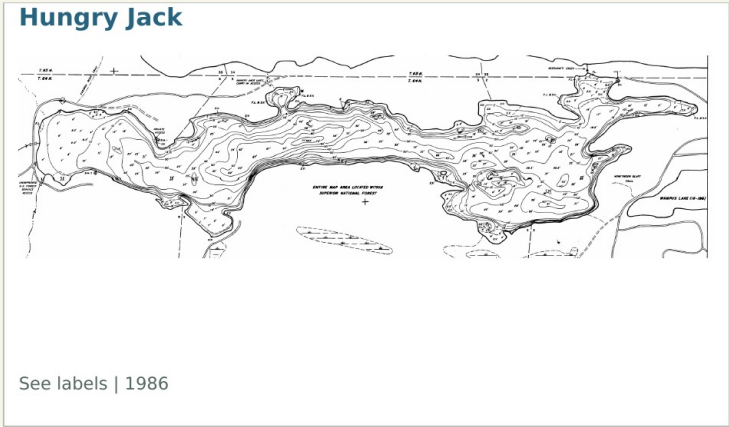

Hungry Jack to Rose

CANOE COUNTRY / LAKE DEPTHS, FISHERIES EVIDENCE & EXPERIMENTAL PORTAGE VIEWS

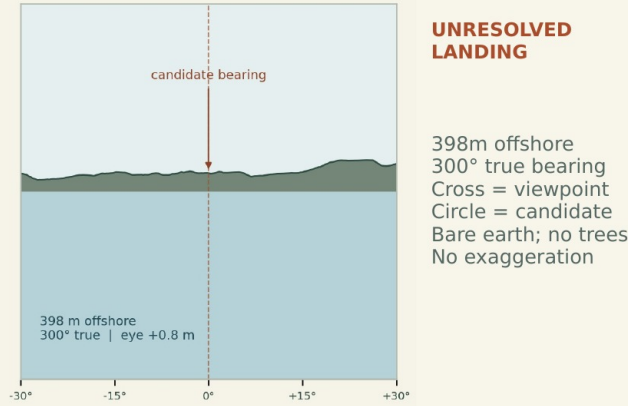

LAKE DEPTH REFERENCE / FEET

Independent historic scans • orientation/scale differ from route map • full originals included

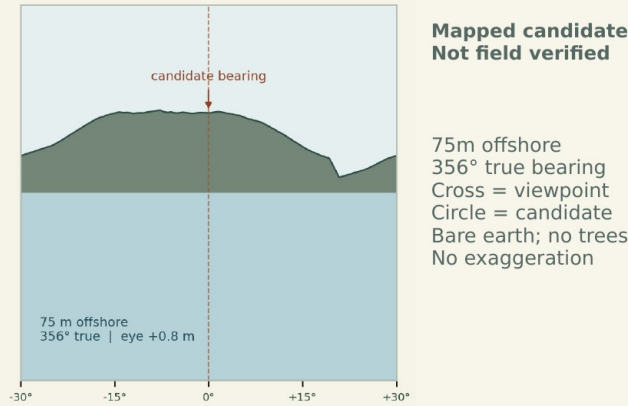

CANOE-EYE TERRAIN / EXPERIMENT

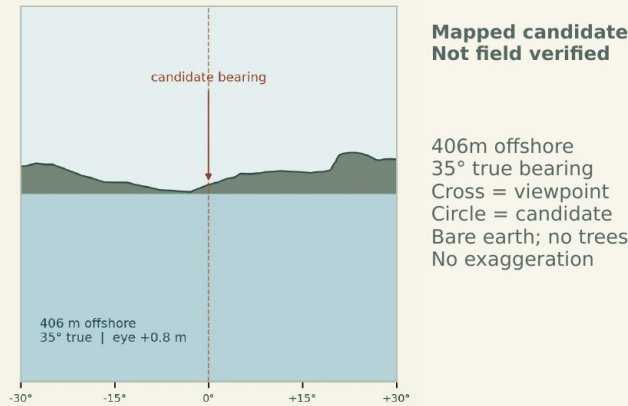

P01 Hungry Jack → Moss

P02 Moss → Duncan

P03 Duncan → Rose

P01: trail/shore mismatch (~383m). P10/P11: no USFS trail. Use these three as research candidates, not aim points.

Rose, Rove & Mountain

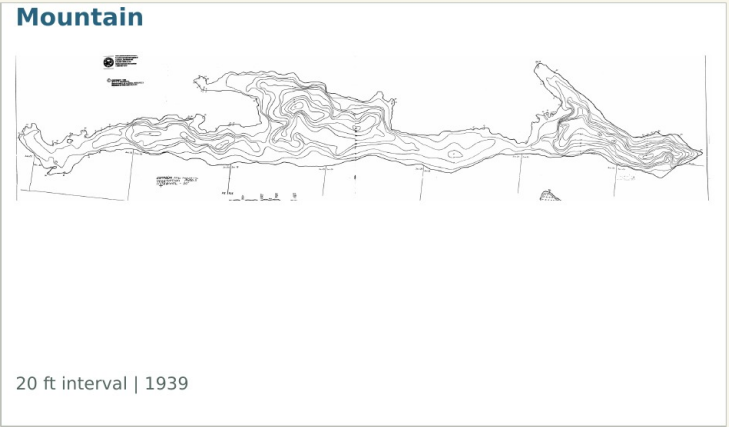

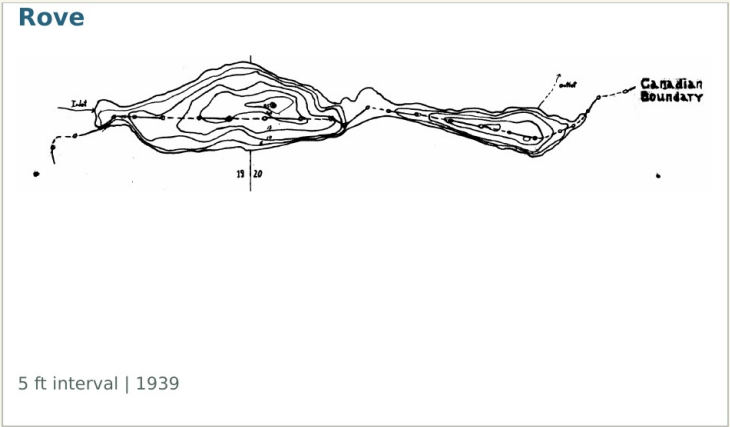

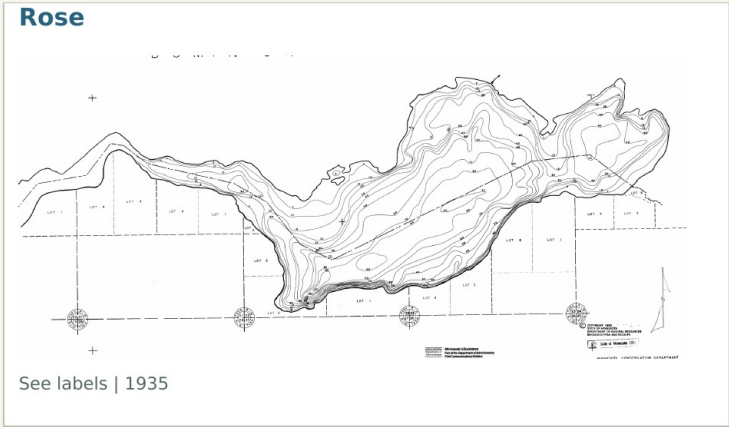

CANOE COUNTRY / LAKE DEPTHS, FISHERIES EVIDENCE & EXPERIMENTAL PORTAGE VIEWS

Colored line: 2008 route • Brown dash: USFS portage • Green dash: BWCA boundary • Blue numbers: depth feet • [S]: stocking

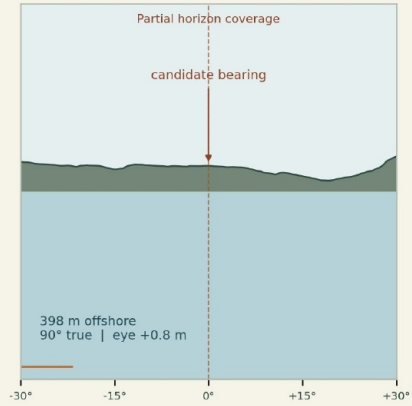

LAKE DEPTH REFERENCE / FEET

Independent historic scans • orientation/scale differ from route map • full originals included

CANOE-EYE TERRAIN / EXPERIMENT

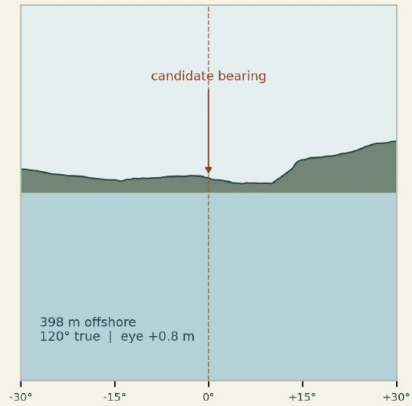

P04 Rose → Rove

Mapped candidate
Not field verified

398m offshore
90° true bearing
Cross = viewpoint
Circle = candidate
Bare earth; no trees
No exaggeration

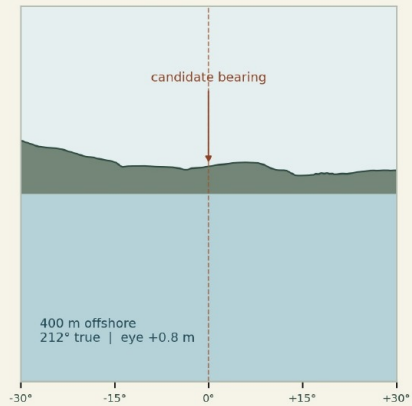

P05 Watap → Mountain

Mapped candidate
Not field verified

398m offshore
120° true bearing
Cross = viewpoint
Circle = candidate
Bare earth; no trees
No exaggeration

P06 Mountain → Clearwater

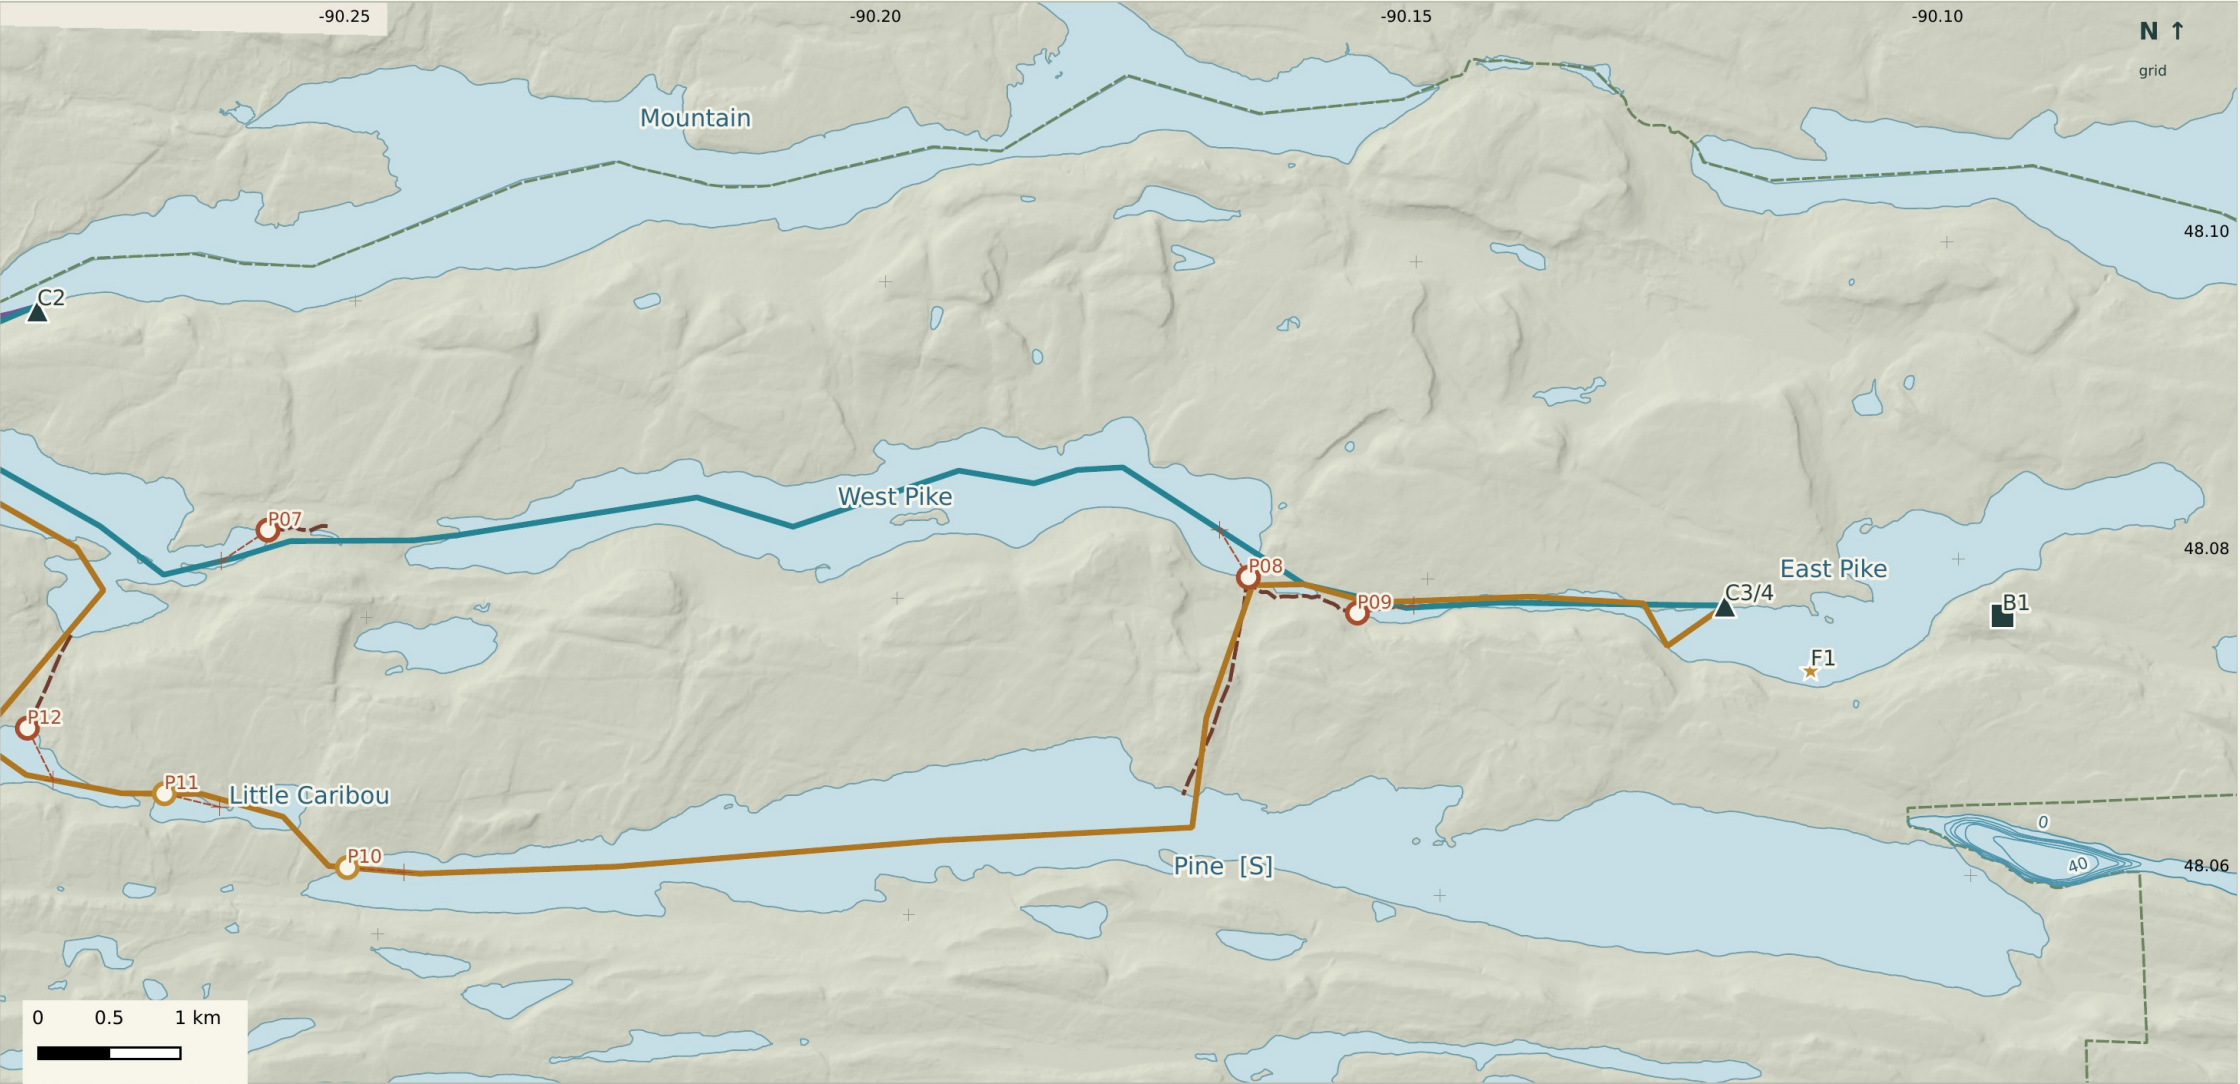

Mapped candidate
Not field verified

400m offshore
212° true bearing
Cross = viewpoint
Circle = candidate
Bare earth; no trees
No exaggeration

P01: trail/shore mismatch (~383m). P10/P11: no USFS trail.
Use these three as research candidates, not aim points.

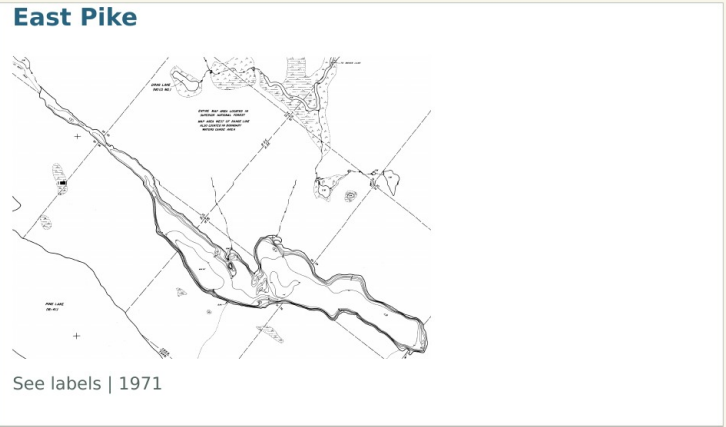

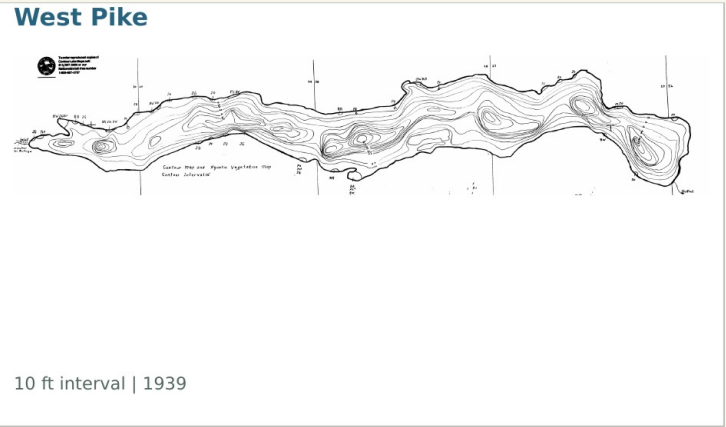

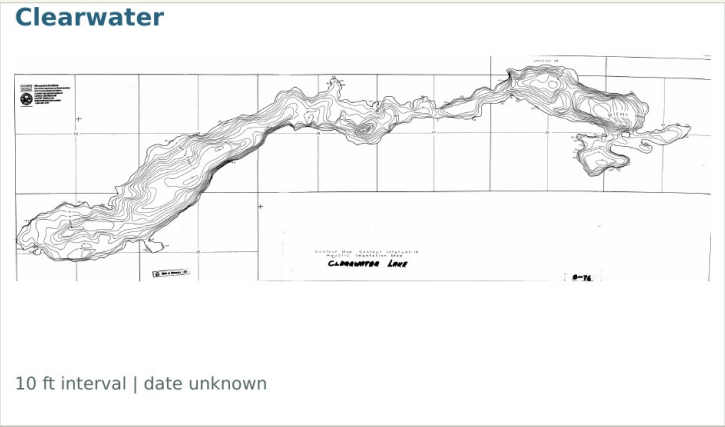

The Pike lakes

CANOE COUNTRY / LAKE DEPTHS, FISHERIES EVIDENCE & EXPERIMENTAL PORTAGE VIEWS

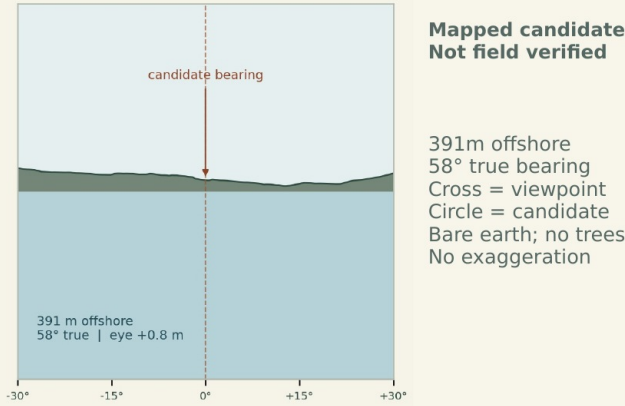

LAKE DEPTH REFERENCE / FEET

Independent historic scans • orientation/scale differ from route map • full originals included

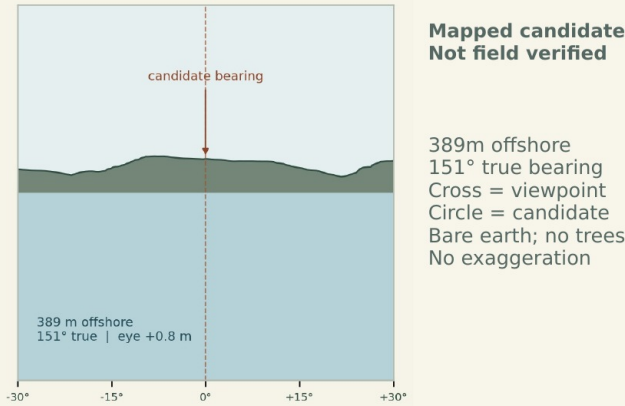

CANOE-EYE TERRAIN / EXPERIMENT

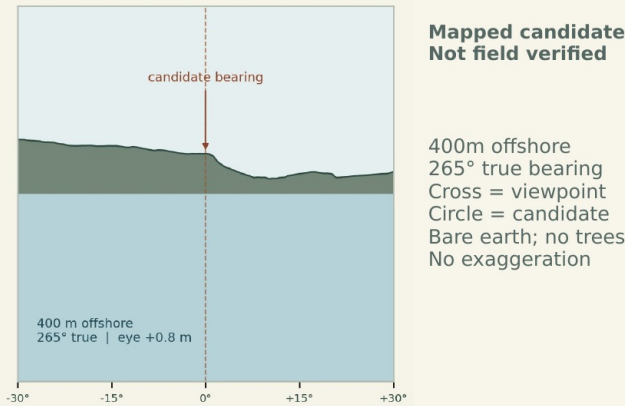

P07 Clearwater → West Pike

P08 West Pike → East Pike

P09 East Pike → Pine (junction)

P01: trail/shore mismatch (~383m). P10/P11: no USFS trail. Use these three as research candidates, not aim points.

Pine, Caribou & Clearwater

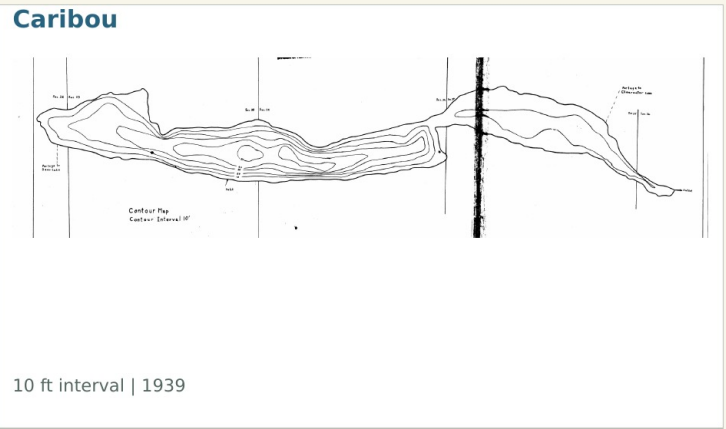

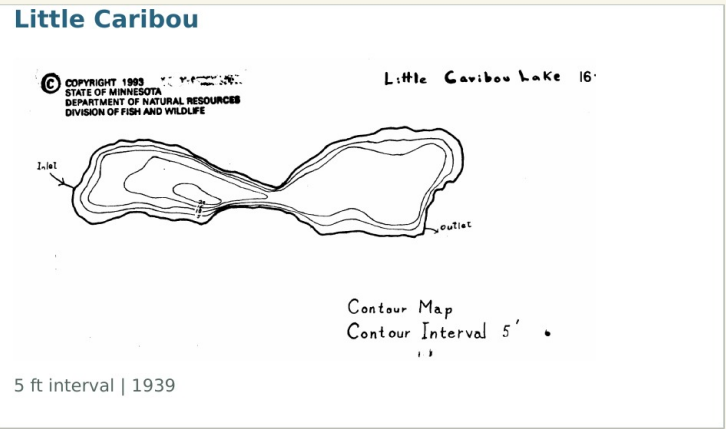

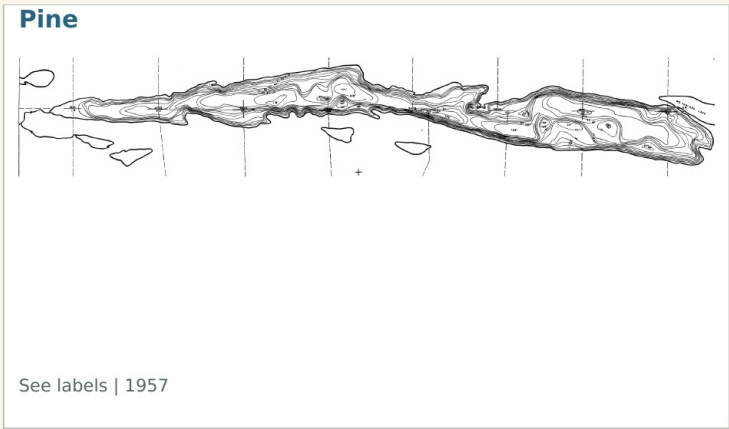

CANOE COUNTRY / LAKE DEPTHS, FISHERIES EVIDENCE & EXPERIMENTAL PORTAGE VIEWS

Colored line: 2008 route • Brown dash: USFS portage • Green dash: BWCA boundary • Blue numbers: depth feet • [S]: stocking

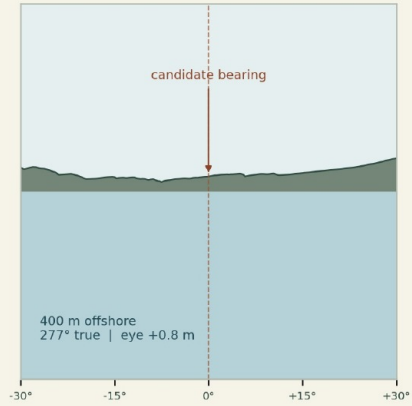

LAKE DEPTH REFERENCE / FEET

Independent historic scans • orientation/scale differ from route map • full originals included

CANOE-EYE TERRAIN / EXPERIMENT

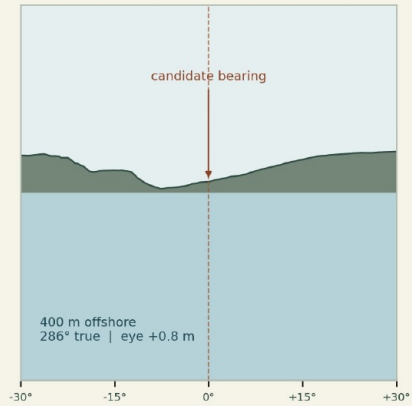

P10 Pine → Little Caribou

UNRESOLVED
LANDING

400m offshore
277° true bearing
Cross = viewpoint
Circle = candidate
Bare earth; no trees
No exaggeration

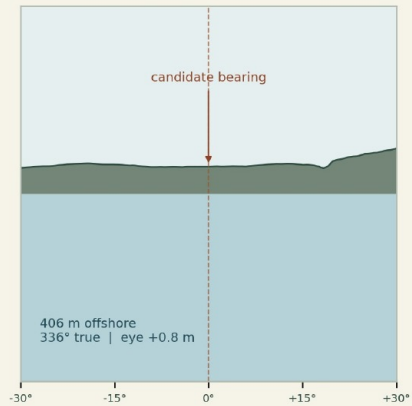

P11 Little Caribou → Caribou

UNRESOLVED
LANDING

400m offshore
286° true bearing
Cross = viewpoint
Circle = candidate
Bare earth; no trees
No exaggeration

P12 Caribou → Clearwater

Mapped candidate
Not field verified

406m offshore
336° true bearing
Cross = viewpoint
Circle = candidate
Bare earth; no trees
No exaggeration

P01: trail/shore mismatch (~383m). P10/P11: no USFS trail.
Use these three as research candidates, not aim points.

What the lake records actually say

Survey = latest returned standard fish-catch survey; newer temperature/oxygen visits are not fish population surveys.

LAKE / DNR ID	MAX FT ¹	SURVEY	ANGLING SPECIES CAUGHT ²	STOCKING REPORT ³
Hungry Jack 16022700	71	2020	BG, GS, HS, NP, SMB, WAE, YP	Walleye: 2025, 2023, 2022, 2019, 2017
Moss 16023400	86	2016	LT, SMB	No data in current 10-year report
Duncan 16023200	130	2018	GS, LT, SMB	No data in current 10-year report
Rose 16023000	90	1987	BG, LT, SMB, YP	No data in current 10-year report
Rove 16013700	30	1991	GS, SMB, YP	No data in current 10-year report
Watap 16013800	45	1991	GS, SMB, WAE, YP	No data in current 10-year report
Mountain 16009300	210	2011	LT, SMB	No data in current 10-year report
Clearwater 16013900	130	2020	GS, LT, SMB, YP	No data in current 10-year report
West Pike 16008600	120	2023	LT, SMB	No data in current 10-year report
East Pike 16004200	40	2002	MUS, NP, SMB, YP	No data in current 10-year report
Pine 16004100	113	2023	LT, NP, SMB, WAE, YP	Lake Trout: 2022, 2019, 2016
Caribou 16014100	65	2000	NP, SMB, WAE	No data in current 10-year report
Little Caribou 16014200	18	1996	NP, SMB, WAE, YP	No data in current 10-year report

READ THE LEGEND

LT lake trout • SMB smallmouth bass • NP northern pike
WAE walleye • YP yellow perch • MUS muskellunge
BG bluegill • GS green sunfish • HS hybrid sunfish
[S] recent stocking record: Hungry Jack and Pine only
Gold F1/F2 stars: personal 2008 bass observations.
Depth contours suggest structure, not proven fish locations.

EVIDENCE LIMITS

¹ Maximum depth is DNR lake metadata, not the deepest scan label.
Historical scans and metadata can disagree (e.g., East Pike).
² Lake-wide catches, not mapped survey stations or current abundance.
³ No recent stocking data does not mean never stocked.
Watap: no DNR depth scan listed. Other scans may be old/incomplete.
Portage silhouettes omit canopy; P04 has incomplete horizon coverage.

SOURCES & FULL DETAIL

DNR LakeFinder / lake maps & surveys • MnGeo second-generation lidar • USFS National Forest System Trails
Clickable lake rows open reports; depth panels open scans. Original depth PDFs are also embedded attachments. Full methods: README and docs/.
