Red Canyon Bike Trail * †

Thunder Mountain * †

X: miles from start. Y: ft relative to first valid sample. Cutouts: N up; dot=start; color/number=part. Metrics: part: miles +ascent/-descent (ft). * Map section. † DEM gap; see data.

Axes vary by trail; drawn profile angles do not measure grade. Y = feet from start; X = miles. Total climbing / descent are separate estimates.

3DEP mosaic fallback: 15 / 10 / 13.75m output cells; native lidar provenance unverified. 30m sampling; smoothing and 3m noise threshold. Cutouts: orientation only.
