

QUILCAYHUANCA—COJUP · HUAPI PASS

NORTH UP · Recorded GPS route with two terrain-review enlargements

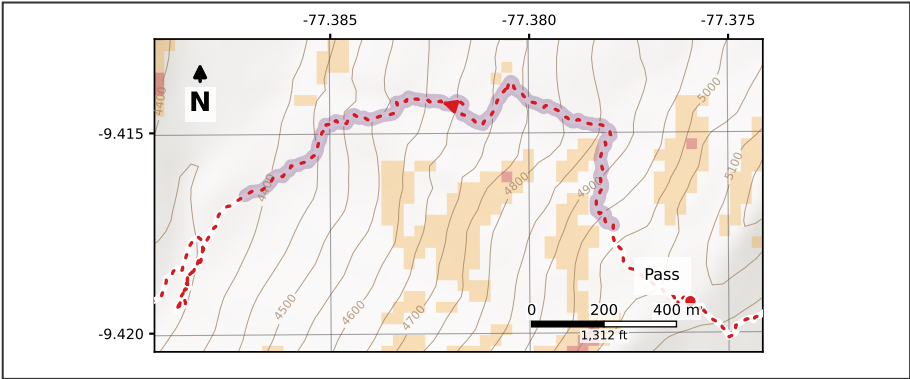

A APPROACH TO HUAPI PASS

Reported ~6 ft (1.8 m) step; exact location unconfirmed.
Purple segment: final ~600 m of approach; step not resolved.

B NORTH-SIDE TURN / COJUP DESCENT

Purple segment: ~0.4–2.2 km after the pass.
Review for cliff bands; shaded cells do not confirm cliffs.

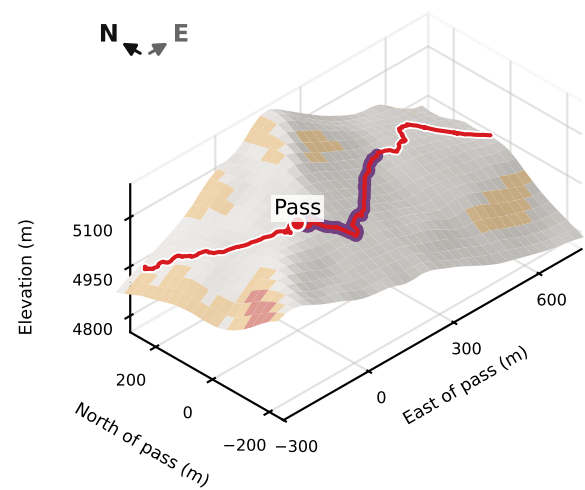

Recorded GPS route Approximate review section Modeled slope 35–45° Modeled slope ≥45°

Copernicus GLO-30 satellite DSM (~30 m), not LiDAR. Contours: 100 m overview / 50 m insets; elevations in meters (EGM2008).
Enlargement adds no terrain detail. Slope shading describes terrain around the route, not trail grade, confirmed cliffs, or safe passage.
Source: your GPX from pwde/qgis · Copernicus DEM / AWS · Style adapted from your Upper Big Quilcene map · Prepared 5 Oct 2026

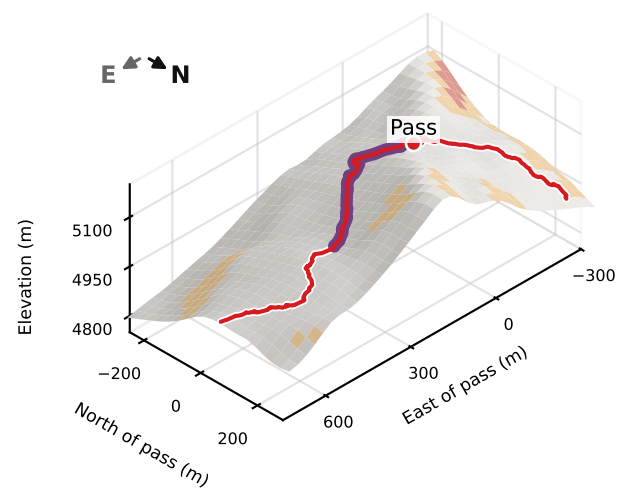

A · APPROACH TO HUAPI PASS

Four perspectives on the final approach. Reported ~6 ft step remains unlocated and unresolved.

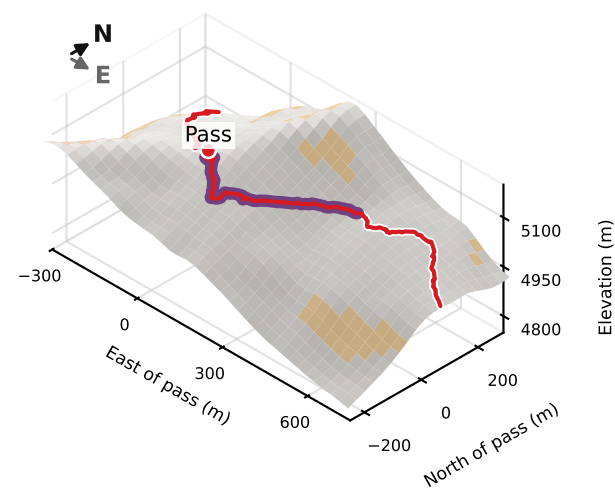

FROM SOUTHWEST · LOOKING NORTHEAST

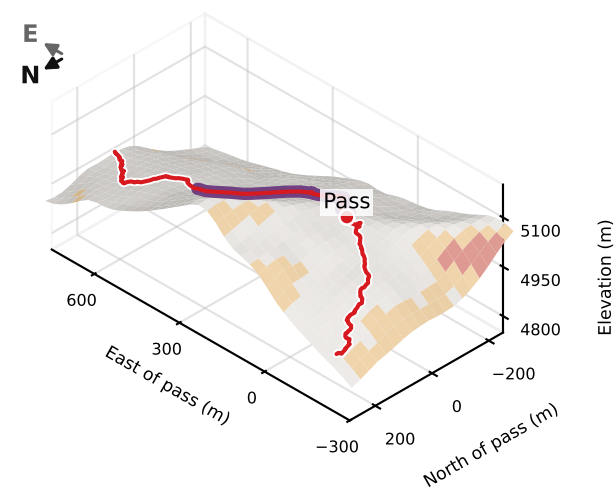

FROM NORTHEAST · LOOKING SOUTHWEST

FROM SOUTHEAST · LOOKING NORTHWEST

FROM NORTHWEST · LOOKING SOUTHEAST

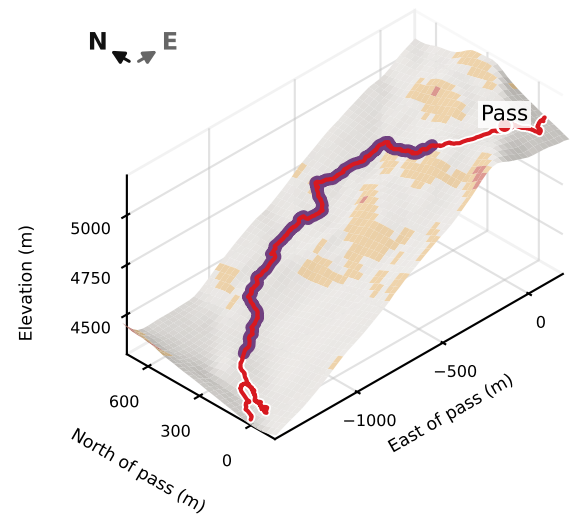

— GPS route — Approximate review section — Modeled slope 35–45° — Modeled slope ≥45°

Equal horizontal and vertical scales · orthographic views at 35° elevation · N/E arrows show ground directions in each view.
30 m satellite terrain, not LiDAR. Route drawn over the surface for visibility; shaded slopes are not verified cliff edges.

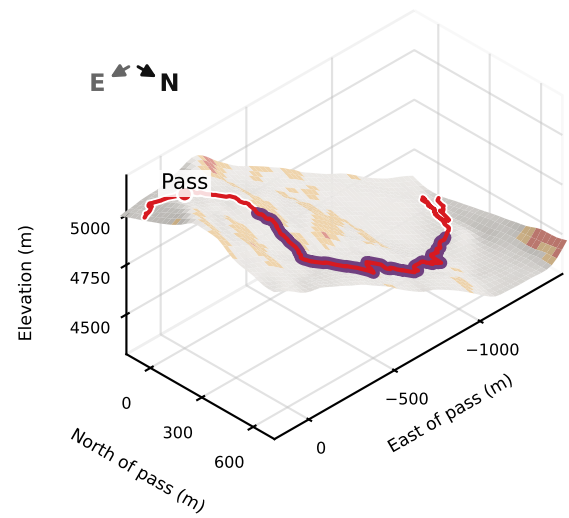

B · NORTH-SIDE TURN / COJUP DESCENT

Four perspectives on the turn and descent. Purple shows the same approximate section as the plan map.
