A DRAUGHT OF THE EASTERN LAKES

The Canoe Traveller's Network

80 eastern lakes / Shapes remembered; time emphasized / A modern hypothetical exercise

THE RECKONING

All ranges are hours. Lake number = longest modeled crossing between mapped landings; alternatives in the register.
Carry number = double-carry travel and handling. Small letters/numbers identify the carry; * marks approximate geometry.
Leader lines attach displaced labels to their lake or passage. Dashed passages are water connections.

Landmarks: named lake views; (walk) = leave the water to visit.
Source-shaped, deliberately distorted; no uniform scale.
Use the geographic evidence project for true positions. Windbound waits are extra.
