

WHITE CHUCK MOUNTAIN

Summit ridge · June 2015 lidar · one-meter terrain analysis

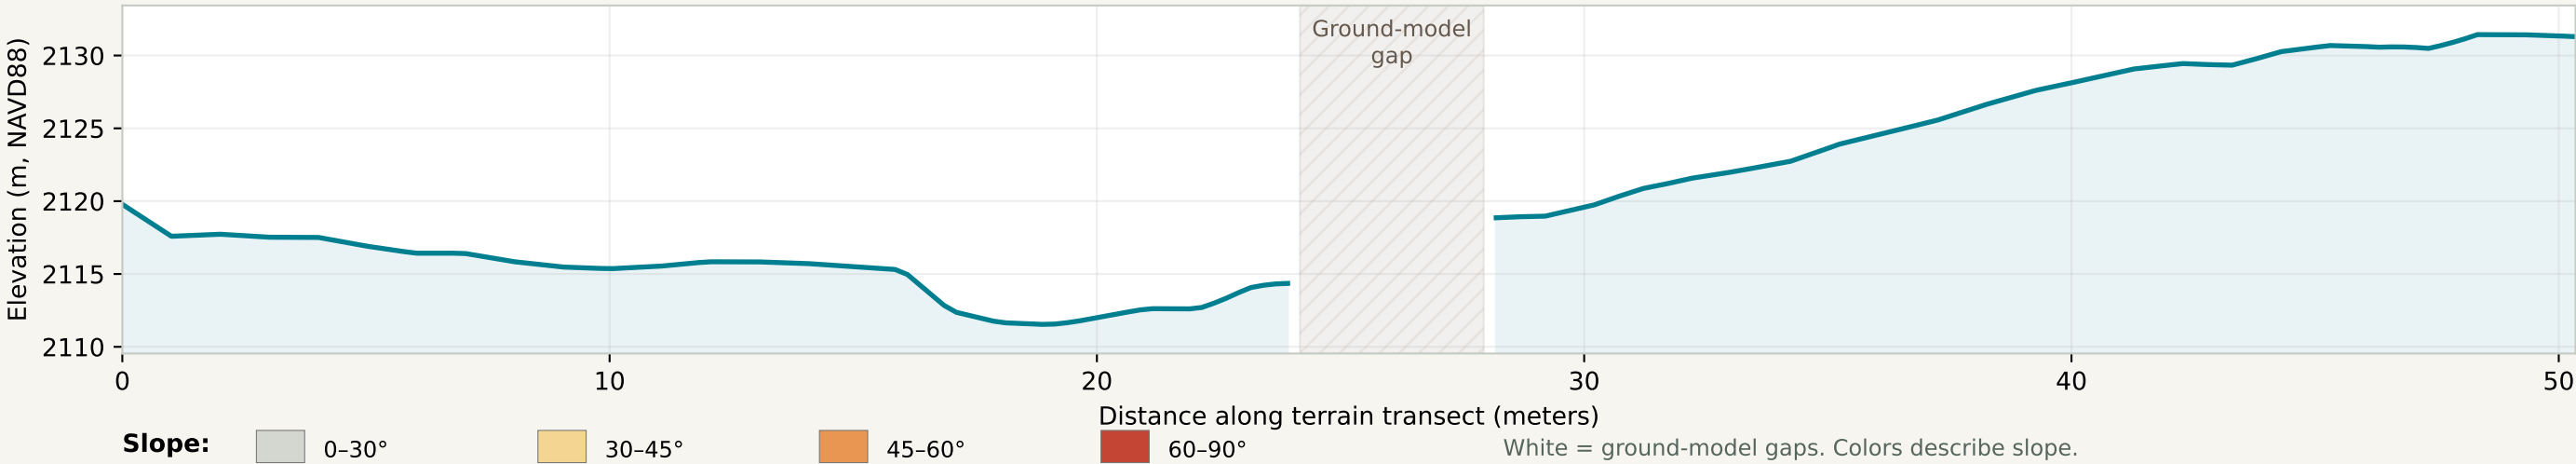

01 Terrain context

02 Close-up: steep terrain and ridge notch

03 Terrain transect across summit notch — dashed line above, analytical line, separate from GPX

Sources: USGS / NOAA lidar; WA DNR hillshade; Lucas' Mountain Knowledge GPX, July 23, 2024. Magenta = recorded route.
Cyan circle: notch identified by you; pin and GPS route are approximate. Ground-model gaps can contain unclassified laser returns.
